

smoother,  
tighter,  
more beautiful skin

— we can help  
you get there

The revolutionary **NEW** Aluma™ with **FACES™** treats skin texture and laxity to help restore the look of youthful skin. This unique technology passes energy deep into the tissue, contracting collagen while bypassing the tissue's surface. All you see is the result — smoother, tighter, more beautiful skin.

Aluma™  
skin renewal
